A large brush designed for cleaning all types of rims. Thanks to split fibers, it can be used to clean the most delicate surfaces. Its flexibility and reduced density allow you to reach even the most difficult places available. It is characterized by strength and resistance to strong preparations, and its fibers do not deform. The reinforced handle protects the hand during complex movements. It is extremely easy and safe to use. The brush is perfect for cleaning the entire surface of the wheel - tires and rims, regardless of the material and type of ribs. It can also be used to clean the engine compartment.
